

HOW TO REQUEST BONDS TO BE ISSUED

The Federal Bonding program is automated to enable state bonding coordinators and government agencies to purchase and request bonds online. Below is a quick guide on how to request bonds to be issued.

Go to www.fbp.bonds4jobs.com to create login and password. Login with your credentials.

Enter the number of bonds that the individual will need (up to 5 bonds for \$5,000 each.)

Select the Bond ID #(s) from a drop down list of your available bonds. The total bond limit will be automatically calculated.

Enter the request info for your job placement agency, the employer information, and the worker to be covered, along with the requested start date and other required fields.

Click "PROCESS" and you have just requested the bond to be issued and your certificate request will be reflected in your account. The official bond will be mailed directly to the employer within 10 days.
